

To Add a one-digit number to a teens number using a Known Fact

1 First, there were 16 eggs. Then Lucy found 2 more eggs.

Now, how many eggs are there in total?

$$\square + \square = \square$$

Number Bonds to Help

$$6 + 2 = \square$$

$$16 + 2 = \square$$

What is the known fact?

2 First, there were 12 children at a party. Then, these children arrived.

Now, how many children are at the party?

$$\square + \square = \square$$

3 Complete the number sentences and MATCH the number bond.

a)  $13 + 5 = \square$

b)  $7 + 11 = \square$

c)  $15 + 2 = \square$

d)  $\square = 8 + 12$

e)  $\square = 16 + 3$

Number Bonds

$$2 + 5 =$$

$$8 + 2 =$$

$$5 + 3 =$$

$$7 + 1 =$$

$$3 + 6 =$$
