

To use the 'Make 10' strategy and add two 1-digit numbers

1 Work out $8 + 5$.

Use the

 to help you.

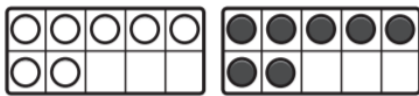

$$8 + \square = 10$$

$$10 + \square = \square$$

$$\square + \square + \square = \square$$

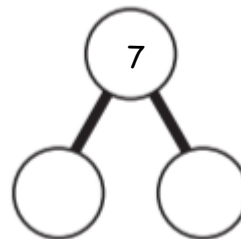

2 Work out $7 + 7$.

$$7 + \square = 10$$

$$10 + \square = \square$$

$$\square + \square + \square = \square$$

3 Use each of these numbers once.

7	5	8	9
---	---	---	---

Make the greatest total and the smallest total.

Greatest: + =

Smallest: + =

I will pick two numbers and work out the total. Then I will try a different two numbers.
