

To use the 'Make 10' strategy and Subtract a 1-digit number from a teen number (part 2)

1

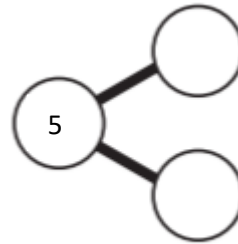

Work out $12 - 5$.Use the

 to help you.

$$\square - \square = : 10$$

$$10 - \square = \square$$

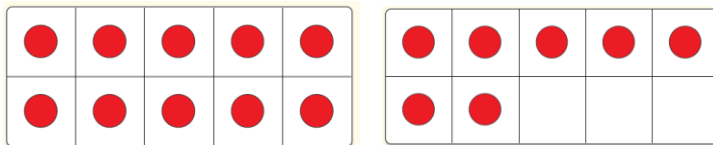

$$\square - \square = \square$$

First, I need to work out what makes 10.

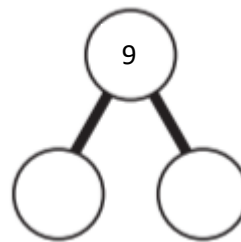

2

Work out $17 - 9$.

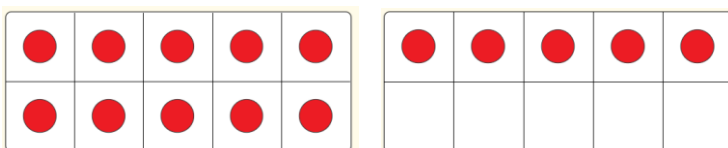

$$\square - \square = : 10$$

$$10 - \square = \square$$

$$\square - \square = \square$$

3

Work out $15 - 7$.

$$\square - \square = : 10$$

$$10 - \square = \square$$

$$\square - \square = \square$$
