

The 5 Times Table Dot to Dot

Begin at a start. Join the dots by following the numbers in the 5 times table. If you get to the  symbol, follow this path – it is a tricky bit where you could go wrong! If you get to the  symbol you have to choose which paths to follow... But be careful! Not all of the paths are in the 5 times table so make sure you only follow the correct ones! If you hit a  symbol then that is the end of that path... Then begin again at the next start! When you get to the end of the 5 times table – 60 – just look for 5 and start again...

Good luck!
